

Ablakela - enhanced CD-ROM

Prepared for: Dana Claxton and Glenn Alteen
by: Jay Thompson - 604.716.6657

What is it?

An enhanced CD is a CD format containing both digital audio and data portions.

1. Audio - playable in any audio CD player
2. Data - video, graphics and text organized and presented within a multimedia application. Playable on most Macintosh and Windows based computers.

Why?

- inexpensive and easy dissemination
- will compile together many elements of the performance
 - ie. music, video of the performance, narratives, etc...plus any addendums like stories, essays, history, images
- ◀ installations.....play CD from computer to video monitors or projector.

Timeline.

Approximately 4 months production

1. gather source materials
 - audio digitally transferred from DAT to CD.....at the Front?
 - video...performance tapes etc...
 - photos, graphics, stories, essays, history ✓
2. story board
 - decide on materials to be included...video, audio, etc...
 - look and feel and progresion of multimedia presentation.
3. create presentaion shell and prepare source materials
 - Macromedia Director, Photoshop, and Quicktime are the major programs used
4. compile data into presentation
5. critique and test
6. prepare master CD and press
