

THE CORPORATION OF THE CITY OF PORT COQUITLAM

PARKS AND RECREATION COMMITTEE

A meeting of the Parks & Recreation Committee was held in the Port Coquitlam Recreation Office on June 13th, 1984 at 4:00 p.m.

In attendance were Alderman Keryluk and Alderman Farnworth

Also in attendance was K. Janna Taylor, Parks and Recreation Director

CONFIRMATION OF MINUTES

That the minutes of the meeting of the Parks & Recreation Committee held on Wednesday, May 30th, 1984 be taken as read and adopted.

Item No. 1 Air Quality Monitoring

The attached letter was reviewed by the committee.

Recommendation:

That we permit the G.V.R.D. to install an air quality monitoring station on the roof of the Wilson Centre.

CARRIED

Item No. 2 Reeve Street Soccer Field

Janna Taylor reported that the construction of the field was coming along well. It was pointed out that we are going to be very close with the budget! It was originally hoped that we would be able to come under budget, however one corner of the field posed a problem and we had to dig deeper and therefore more fill was required. The sand is being brought in next week.

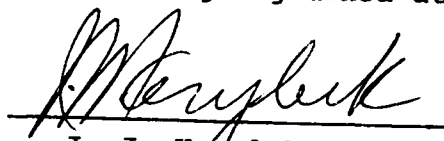

Recommendation:

That the report be received.

CARRIED

ADJOURNMENT:

The meeting adjourned at 5:00 p.m.

  
J. J. Keryluk,  
Chairman

  
K. Janna Taylor,  
Secretary

June 4, 1984

Attention: Janna Taylor,  
Parks and Recreation Director.

Dear Miss Taylor:

Re: Air Quality Monitoring.

We are requesting the assistance of the City of Port Coquitlam in locating an air quality monitoring instrument in Port Coquitlam.

The air quality monitoring station T10 which was located at 3288 Hastings Street has been moved to the new Eagle Ridge Hospital. We would like to locate a Total Suspended Particulate (TSP) Sampler in the central area of Port Coquitlam to ensure that the City continues to be represented in the GVRD ambient air quality monitoring program.

The TSP instrument is about 18 inches x 18 inches by 4 feet high and requires an outdoor site with access to 110 volt power. Electricity consumption is in the order of 40 kWh per month (approximately \$2.00 per month). At other monitoring stations, the electricity cost has been covered by the City or Municipality. This would be the only cost to the City. The instrument would be serviced by our technician once per week. I believe that Mr. Al Percival has met with you to discuss a proposed location on the roof of Wilson Centre.

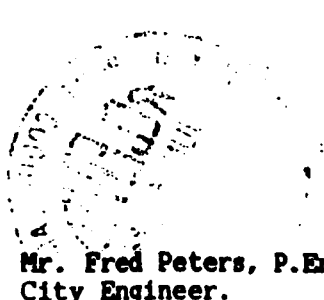

I have enclosed a copy of the 1982 GVRD Ambient Air Quality Annual Report for your information. The air quality monitoring network is described in Section 1 of this report. As you can see from the map on page 5, we have 33 Total Suspended Particulate Samplers located in 14 GVRD communities.

We trust that this request will receive your favourable consideration and that we will receive your permission to proceed with this project. Please contact Mr. Al Percival or myself if you require any additional information.

Yours truly,

  
Morris Mennell, P.Eng.,  
Air Pollution Control.
