Dear Mr. Vance:

We have a case in which it is imperative to ascertain if a signature in ink was placed on a document within the past week or many months ago.

We understand that there is some scientific technique which could be used to ascertain this. We have called the various chemists in the City but none of them are competent in this regard and have referred us to you. We have spoken to Mr. Lloyd of B. C. Research Council and he also referred us to you and said that possibly you could tell us who would be competent to do this.

We would appreciate any information you could give us in this regard and if there is no one in Vancouver capable of doing so, do you know of anyone in the United States?

Thanking you for any help you could give us.

Yours truly,

Macdonald and Prenter.

RVP/C.
