

September, 6th, 1927.

The following information which is taken from the laboratory records of the undersigned John Fleming Cullen Brown Vance, City and Provincial Analyst, City Hall, Vancouver, B. C., refers only to a few of the many hundreds of Analyses completed by myself for different Departments of the Government of Canada.

During the past twenty years I have been requested by different Departments of the Government of Canada to assist them by undertaking the analyses of various samples and exhibits purchased or seized by Dominion Government Officials in the performance of their duties, and numerous convictions have been recorded in the different Courts as a result of my Analyses and Certificates.

Many hours and sometimes days are required in the examination of individual samples and exhibits, and a great many hours have also been spent in the different Courts in giving evidence and undergoing cross-examination.

The analyses and inspections referred to have been completed with absolutely no cost to the various Branches of the Federal Service, no money or consideration of any description has ever been received by myself for assistance given, my services have always been at the disposal of the Dominion Authorities when requests are made by responsible Officials.

The following are some of the Departments of the Government of Canada who have requested and received assistance from myself in the analyses and inspection of various samples and exhibits.

Department of Inland Revenue.
Department of Customs and Excise.
Department of Agriculture, (Dairy & Cold Storage Commissioner)
Department of Dominion Indian Affairs,
Royal Canadian Mounted Police,
Dr. C.J. Fagan, Dominion Analyst, Dept of Inland Revenue, now known as Department of Health,
Department of Militia and Defense, Intelligence Branch,
Department of Militia and Defense, Canadian Army Service Corps
Department of Naval Service, Canada,
Department of Soldiers Civil Re-Establishment.

A few of the examinations are mentioned herewith in order to show the nature of the analyses completed for the different Branches of the Federal Service, I might also state that quite a number of examinations are made each year for Dominion Government Officials, who enter their exhibits through the City Police Department.

Canada, Dept S.C.R., per G.J. Scovill,
Sample of Milk.

May 2nd, 1918, Department of Naval Service, Canada.
File No. B2-4-57.
Shipment of Canned Milk.

No attempt has been made to search the files of the Laboratory but the above record is sufficient to show that for twenty years I have been doing the work of a Dominion Analyst, and that the results of my analyses have been accepted by the different Courts and by the Departments of the Government of Canada.

In again asking that I be appointed a Dominion Analyst, I would remind you that all correspondence in connection with this matter was handed to Pr. Clark, Assistant Deputy Minister of Health, in Ottawa on July, 1926.

The matter of my appointment as a Dominion Analyst has been discussed each year by the City Council, and I understand that the Council is prepared at any time to pass a resolution requesting the authorities to make such appointment, in the interest of the Citizens of Vancouver, B.C.

The matter in so far as the City of Vancouver is concerned is a serious one, as we have absolutely no control over food-stuffs. I am not permitted under the Dominion Act to examine, condemn or prosecute for adulteration of food-stuffs, this power being vested only with Analysts appointed by the Dominion Government, although for years, I have conducted examinations for different Departments of the Federal Service, all of which work has always been done willingly and without charge.

In requesting the appointment as Dominion Analyst, no salary or fees are asked or expected, I am willing to abide by any just regulations which may be imposed, I am also willing that the Chief Analyst in Ottawa should control all of my actions in so far as it affects the appointment as Dominion Analyst, and that no action will be taken as a result of such appointment until it has first received the sanction of the Chief Dominion Analyst.

I am merely requesting the privilege of properly performing my duties as Analyst for the Corporation of the City of Vancouver, with four Food Inspectors covering the city daily, cases of adulteration come to our notice which demands immediate attention, but in these

cases we are helpless. We do condemn and destroy food-stuffs on my certificate as City Analyst, but this is not legal, the situation is at times desperate and we simply must act, but our only reason for acting in this manner is for the purpose of affording in some measure a protection which the public has a right to expect, at any time our authority for action may be questioned, then of course we are at the mercy of the merchants concerned who have a right to question the fact that the analyses were not completed by a Dominion Analyst, in which case we leave ourselves open to legal action and damages.

I am absolutely at a loss to know why this appointment was not given to me long ago, there is no question as to my qualifications, twenty years as City Analyst and year after year appearing before every Court in the land undergoing cross-examination, with cases in the Police Court almost every day, having conducted analyses for years for different Departments of the Dominion Government, without charge, and view of Dominion Appointment requesting no salary or fees, willing to submit myself to all just regulations and to submit all Dominion matters to the Chief Analyst in Ottawa and be guided by his wishes, it seems only fair and just that the appointment should be immediately made, and thereby make legal all of the work already done by this department and avoid any possibility of legal action against either the Corporation of the City of Vancouver or ourselves.

John Fleming Cullen Brown Vance,
City and Provincial Analyst.
City Hall,
Vancouver, B. C.
