Department

Vancouver, B.C.
June 10, 1932.

Dr. J. W. McIntosh,
Medical Health Officer,
City Hall,
Vancouver, B. C.

Sir:

Inspector Mead of the Royal Canadian Mounted Police, Vancouver, B. C., has requested that I make examination for his Department in connection with the case of Michael Lique Essanasa, Dawson, Y.T., charged with murder.

The point involved is the identification and classification of blood stains on clothing, and as this is the only laboratory in British Columbia which undertakes this class of examination, the Royal Canadian Mounted Police ask the assistance of this City in the identification of this part of their evidence.

I have already received the exhibits in this case from the Mounted Police, but await your instructions before proceeding with the examination of same.

Respectfully submitted,

John F. C. B. Vance
City, Provincial & Dominion Analyst
In Charge of Food & Dairy Division.
