

Sequed - Vanishing Cream

(Stearic Acid - Triple pressed)

44 lbs - Stearic Acid (Triple-pressed)
6 lbs - Trihydroxyethyls - Annon - Stearate
3 lbs - Perfume oil
400 lbs - Distilled water
20 lbs - Glycolene

473 lbs

Directions

Melt the Stearic acid & Trihydroxy -
add the Glycolene to the distilled water and
heat to 80 or 90° or preferably to a boil -

prepare the emulsion by adding
the melted Stearic acid etc. to the boiling
water slowly - agitate the mixture
well or let boiling continue for a few
minutes - Let the emulsion cool

gradually - stirring gently but continually
mean while - add the perfume oil -

when this preparation is gradually cooled
and gently stirred, it will give the
desired pearly lustre
