

DIRECTIONS

With tea, coffee, cocoa,
and soups, use diluted.

For dry cereals or with jams, jellies or fresh
fruits and berries, use pure or dilute to taste.
For ice cream dilute with one or two parts
of water or milk. For custards and general
culinary purposes, dilute with 1 or 2 parts of
water according to richness required.

For infants, dilute with from one to eight
parts water that has been previously boiled
and then cooled to blood heat according
to the age and condition of the infant.

Every can guaranteed.
