Glue is too expensive - try and get something else
to take its place

Try table salt for the above

Too much hardener makes Kalsomine brittle
& chips off -

try Sodium Silicate (powder) in place of glue
a to make is washable - is heavy in acids
and cake the Kalsomine -

Glue used is 20¢ per pound

Tablet for

25% Flour

75% Kgo.

Can also approve stamp

Hydro Magnesite

Magnesite straight from the Earth -

Kalsomine -

by H. Cook

7012 Cyprus So.

Formula

1 lb Magnesite

2 - ounces Flour (Bread)

2 - ounces - glue (Insol cold water glue)

4 pounds of the above mixture are mixed
with one gallon of water -

They have tried Sodium Silicate with the above
to try and make a water proof Kalsomine - They want
a Kalsomine that can be wiped with a wet Rag
or washed

Lee 42-177
Page 230

Time whitewash

2 1/2 lbs alum to every
pailful of whitewash
(alum binds whitewash
on walls & does not
let first coat rub off when
applying second coat)
